Speed production of
circuit masks with the

kingmatic
NC MASK CUTTER

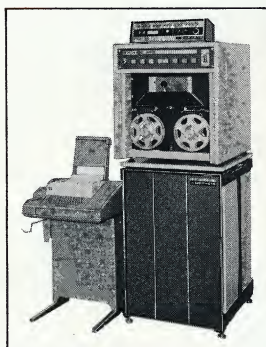

with servo-controlled knife

A-S KONGSBERG VÅPENFABRIKK NORWAY

kingmat

Automatic Precision Mask Cutter

- Numerically controlled director with linear, circular and parabolic interpolation
- Simple programming
- Servo-controlled knife enabling cutting in all directions
- Peeling of masks easy thanks to the clean cuts
- High speed: up to 400 ipm
- High repeatability: $\pm .0006''$
- High accuracy: $\pm .002''$ overall
- Large flat-bed table: 4' x 5'
- Suction holes for material hold-down

Director

Table

- Ask for data sheets on director and table with all tool options
